

JL, HR My claim for the Hageoth \$10,000 on McDonald as fraud HW 1/23/77

To perfect the record I have obtained Herman Edward Kimsey's undated ~~summary~~ ^{resume}. He called it this and had begun to revise it. The largest of the original four parts, the first, is empirical background. His additions were in his own handwriting and are in outline form. They do not relate to his professional intelligence experience except perhaps that he was knighted by the Knights of Malta.

The original typed resume was prepared during his brief marriage. This status is lined through and divorced is written in. But he ~~did~~ did not change the address.

There is the usual ellipsis but where it is not unclear it is certain that he was not in an intelligence function that would have had him dealing with assassins. His role was in the security area. His own concept was forensic sciences. He had to do with training of foreign students in police and intelligence science when they were brought to this country but that was part of his job only.

His specialty was identification and that also is McDonald's claim. He wrote the texts and that is the number McDonald claims.

While I do not know the fact I could even make a case for McDonald lying about his Goldwater security tele. The papers would establish it, of course. Kimsey's employer at that time, 8/64 to 11/64 was the Repub. Nat. Com. He also lists Security Associates as his employer from "May 1963 to date." At the GOP he was "Assistant Chief, Security." Suggests that Security Associates had the GOP contract. Until the nomination, from 2/64 to 5/64 he was area supervisor for the Rockefeller effort in D.C.

He left CIA 9/62. If the circumstances had been horrendous he could hardly have been in these GOP roles. Suggests a political problem. Got CIA cash award 1/62 for suggestions.

There is nothing in his resume to suggest he was a spook. His last job was as a section chief, over analysts.

12/46 to 3/53 he was CIA, largely instructional and in the forensic sciences.

His WW II military experience is in Intelligence, 5/41-11/43. Here his resume skips to 4/45. He then went to the Forest Service, where he had been earlier.

While in the brief account of his wartime duties he refers to "the enemy" he does not mention being overseas or the name of names of any country or countries. Later he refers to duty in Korea but not operational duty. Privately I understand he also pulled duty in Japan. During his military listings not possible. Myx have been omitted or coincide with tour in Korea.

He could have known McDonald at Helabird. He could also have known McDonald because of their professional interests coinciding. But there is absolutely nothing consistent with McDonald's representations.
